

Just For Flowers®

color how-to

Whether duplicating realism or creating fantasy, our rich palette of hues fashions the color of blossom you need. Use these easy techniques and your resourcefulness for unlimited possibilities!

SIMPLE • CLEAN • FAST-DRYING

JUST FOR FLOWERS is translucent flower dye that instantly colors any flower...

fresh or silk and dried botanicals...without concealing the blossom's delicate details.

color infusion

Spray any of the JUST FOR FLOWERS colors on a white or cream colored blossom to change it to that dye color. Additionally, you control the color value.

- 1 Simply apply a light mist for a soft color. (HYDRANGEA BLUE shown here)
- 2 Or deepen the color value created with a repeated misting of spray.

Willow Branch 123

Fresh Green 133

Peacock 134

Osiana Peach 130

Daffodil 131

Hydrangea Blue 135

Pink Petunia 124

Lemon 132

Delphinium Blue 137

Wild Rose 125

Tiger Lily 129

Lilac 139

Poppy 127

Black Cherry 128

Purple Pansy 138

color on color interaction

Remember mixing crayons as a kid? Use those same basic principles to design color on color combinations.

- 1 Select a dye and a flower whose colors are near each other on the color wheel. Using the JUST FOR FLOWERS color as the deeper of the two, spray the blossom to see the analogous hue created. (LEMON on Lite Pink shown here)
- 2 Deepen the created color with additional mists of dye.
- 3 For a monochromatic color enhancement, brighten pale colored flowers with a misting of JUST FOR FLOWERS in the same hue as the pale blossom. (PINK PETUNIA enlivens Lite Pink shown here)

Complimentary colors mix to create brown hues, many of which are beautiful for the right situation. Try WILD ROSE on green cymbidiums to fashion a rich red-brown orchid.

+ red flowers = burgundy hues + violet flowers = blue-violet hues

LILAC

+ blue flowers = lavender hues + pink flowers = red-violet hues

PURPLE PANSY

+ lavender flowers = purple hues + blue flowers = deep blue-violet hues
+ red flowers = red-violet hues

Spray Tips®

■ For a flower-safe application, spray JUST FOR FLOWERS 15"-18" from flower surface and follow label directions.

■ JUST FOR FLOWERS hues can be mixed too! Spray alternating mists of colors to increase your blend-ability.

■ JUST FOR FLOWERS' unique formulation helps slow down the evaporation of moisture through the flower petals, enhancing fresh flower life.

■ JUST FOR FLOWERS beautifully colors sheer ribbons, delicate fabrics and cloth wedding accessories too. Color bouquet collars, fabric boxes and purses, pillows, corsage bands, tulle and more.
